

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PUBLISHERS' NOTE

The present Volume of the ANNUAL CATALOGUE embraces the Works issued and recorded in the 60th or DIAMOND JUBILEE Year of the PUBLISHERS' CIRCULAR.

The number of Publications recorded, as will be seen by the accompanying Analytical Table, is larger by nearly 1,400 than in 1896. In Theology there is a rise of about 100, and Education of 160. A notable rise is that of some 800 in Politics and Commerce. The demand for light reading grows, and new Fiction shows a considerable rise, but its large total is only increased by the same amount as the small total which previously stood to the credit of Politics and Commerce. In Voyages and Travels and in Poetry the figures are much the same as last year. Of Medical Books almost exactly the same number were published as appeared in 1896 but a hundred more than in 1896. In Belles-Lettres the figures are about 80 less than in 1896 and about 90 more than in 1896. Compared with last year, there is a falling off of about a score in Arts and Sciences, but in History and Biography there is an increase of a like number. The whole shows a slight decline. Miscellaneous works maintain an even level.

The Analytical Table is divided into 18 Classes: also New Books and New Editions.

Divisions	1896		1897	
	New Books	New Editions	New Books	New Editions
Theology, Sermons, Biblical, &c. ...	503	100	594	109

		5,234		6,244
		6,573		7,926

In addition to the 7,926 *English Works*, it may be mentioned that this Catalogue contains the Titles &c. of about 400 of the most important *American Works* which have been imported into this country, or the titles of which have otherwise come under our notice.

.... The *full Title* is given, with size, price, publisher, &c., with Subject Titles and cross-references as heretofore.

The issue of the

MONTHLY PART OF THE ENGLISH CATALOGUE,

giving the *full Titles*, under Authors and Subjects, and a more extended classification during the past year has given great satisfaction, and has been found of the greatest value to Booksellers both in this country and abroad.

It cannot be doubted that this giving *full Titles* in the *Annual Catalogue* is a most valuable feature as saving cross-references to the PUBLISHERS' CIRCULAR; but the result is a volume about a hundred pages thicker than the previously issued volumes, and needless to say the cost of printing it is proportionately increased. The Selling Price, Five Shillings, will, however, not be increased.

In view of the approaching publication of Vol. V. embracing in one alphabet the whole of the ANNUAL CATALOGUE 1890-1897, the Editor will feel greatly obliged by having pointed out to him any errors of omission or commission which may be found in the 1897 Volume, or any other Annual Volume from 1890 to 1896.
